### A Square Deal

Is assured you when you buy Dr. Pierce's family medicines—for all the ingredients entering into them are printed on the bottle-wrappers and their formulas are attested under oath as being complete and correct. You know just what you are paying for and that the ingredients are paying for and that the ingredients are gathered from Nature's laboratory, being selected from the most valuable native medicinal roots found growing in our American forests and while potent to cure are perfectly harmless even to the most deltate women as partition. Not a drop of alrahol enters into their composition. A much better agont is used both for extracting and preserving the medicinal principles used in them, viz.—pure timber three growing and preserving the medicinal principles used in them viz.—pure timber into a growing a most valuable antiseptic and antiferment, nutritive and soothing demulcent.

ferment, nutritive and soothing demulcent.

Givestine plays an important part in Dr. Pierce's Golden Medical Discovery in the care of indigestion, dyspepsis and weak stomach, attended by sour risings, heart-burn, foul breath, coated tongue, poor appetite, gnawing feeling in stomach, biliousness and kindred derangements of the stomach, liver and bowels.

Besides curing all the above distressing aliments, the "Golden Medical Discovery is a specific for all diseases of the mucous mombranes, as catarrh, whether of the nassil passages or of the stomach, bowels or pelvic organs. Even in its ulcerative stages it will yield to this sovereign remedy if its use be persevered in. In Chronic Catarrh of the Ansal passages, its well, while taking the "Golden Medical Discovery" for the necessary constitutional treatment, to cleanse the passages freely two or three times a day with Dr. Sage's Catarrh Remedy. This thorough course of treatment generally cures the worst cases.

In coughs and hoarseness caused by bron-

In coughs and hoarseness caused by bron-chial, throat and lung affections, except conn coughs and hogseness caused by bronai, threat and lung affections, except connotion in its advanced stages, the "Golden
dical Discovery" is a most efficient rembe specially in those obstinate, hange on
in a case of bronchial muccus membranes. The "Disrery" is not so good for acute coughs arisfrom sudden colds, nor must it be exted to cure consumption in its advanced
gos—on medicine will do that—but for all
obstinate, chronic coughs, which, if negted, or hady treated, lead up to consumpm. If to the best medicine that can be taken

THE GULF STORM.

With the city of New Orleans entirely | A. stripped of wire communication with the world and reports trickling in from points along the gulf between Pascagoula, Miss., and Pensscols, Fig., of high tides and winds of hurricane velocity, it is apparent from the meager in-formation thus far received that the gulf storm which struck that section of the United States has scored heavily in property damage, if not in loss of life. No casualties have been reported thus

Interest settels on New Orleans, be-cause of the absence of advices from that city since 3 o'clock yesterday afternoon. At that time the piling up of the Gulf waters at the mouth of the Mississippi river had already caused a rise of three feet in the waters of the river at New Orleans-a rise upprecedented at that point from such a source. A report says the waters of Lake Borgue were driven a mile inland.

The most threatening of the definite advices thus far received came from Pensacolo, where the wind at dark had at-tained a velocity of 60 miles an hour and was apparently increasing.

Reports of increasing gales toward Hatters slso seem to indicate that the

horricane is heading that way.

Up to 11 o'clock nothing had been heard from New Orleans, expect a brief message, which was received about 10 o'clock, telling of the unroofing of buildings by the gale. Communication with New Orleans by way of Mobile is entirely cut off.

The Gulf storm struck Riloxi, Miss., at 3 o'clock yesterday morning, the wind increasing until it reached a velocity of 60 miles, at 5 o'clock yesterday afternoon and still incressing. It is estimated that \$40,000 to \$50,000 worth of property

has been damaged.
Points south of Vicksburg report a

evere storm prevailing. News from the towns in Pinsr Del Rio, Oaba, tells of disaster caused by the latest hurricane. Many lives were lost Thousands of houses have been wrecked and many fishing boats suck. The loss of property is estimated at more than \$6,000,000. The Isle of Pines, where most of the inhabitants are Americans, also suffered heavily from the hurricape. The orange crop is said to be destroyed and many houses are in ruins. Daily deliveries made to

MODERN CAVE DWELLERS. One of the most prominent and suc-

cessful farmers living in the vicinity of Prairie Grove, Ark., has dwelled in a cave for years. It is probably the most palatial cave in the world, and is fitted up with all modern conveniences, in-cluding hot and cold water, electric fans, electric lights and steam heat. He discovered the cave at the top of a moundiscovered the cave at the top of a mountain, 1,700 feet high. It is 78 feet long by 25 feet wide, and 32 feet high. The walls are of beautiful granite, which have been handsomely pollshed. The ceiling is 40 feet thick. The front of the cave is of glass, which the owner and occupant, H. S. Mobley, put in, together with hardwood floors. The flues for the cooking range pass out through the mouth of the cave and extend outward a distance of nearly 40 feet. Movable distance of nearly 40 feet. Movable screens permit the increase and reduction of rooms at the pleasure of the occupants. A fine spring at the top of the mountain furnishes water through a private system of waterworks. This novel dwelling was completed about two years ago. It is approached by a beautiful road ascending the crest of the mountain by casy stages, and the grounds about the cave are kept in perfect condition. The occupants declare that it is the coolest dwelling in summer and the most comfortable in winter, and they have no fear of cyclones, which are frequent in that region. Neither heat nor cold penetrates the solid protection of yards of granite. Mr. Mobley says he will live in the cave for the rest of his

Oyster Situation is Satisfactory. Richmond, Va., Sept. 21.—The oyster situation in Virginia is eminently satisfactory from the sanitary standpoint according to an official statement gives out today by the State Health Department. Experts in the service of the lepartment have recently examined the cyster beds along the Chesapeake and have issued health certificates to score of ongers and planters. This investigation s the outcome of the agitation of last winter, when reports were circulated to the effect that unhealthy cysters were being supplied to northern markets by Virginia dealers. These reports did great damage to the oyster industry, and threatened, for a time, to bankrupt a number of large packers. At the re-quest of the oyster men, the State Health Department last winter made an lovestigation of the situation, and found that conditions had been greatly exaggerated in the northern press. A few planting beds were found in an unsavitary condition, but the majority were above surpicion. The investigation just concluded was intended by the health authorities to inspect the plants which were condemned last year. Health officers found that all the dangerous oyster grounds had been abandoned and that uniform mprovements had been made. The decision of the health authorities was re-

ceived with approval by those interested
